Nearest airport is Toronto/ON.

**July 15 to 20<sup>th</sup>, 2012**

Deposit, 50%, Deadline May 15th

**Pre-requisite:** basic understanding of yoga and vibrational healing, a sincere commitment to self transformation and becoming a metaphysician for personal and collective healing and peace.

This intensive is based on the premise that the planets are relay stations for the reception and transmission of celestial energies that affect our every thought and deed. The nine Luminaries bring the forces of the galaxy alive in us and direct our path of evolution. Each planet contains a portion of the cosmic rainbow way, upholding its vibration in our solar system. Our karmas, in accordance with our birth chart, and how they ripen in this lifetime will determine the state of our consciousness, our gains and losses, our successes and trials. Most of our relationships are according to planetary affinities. Most of our actions are governed by the nature of the planet that dominates our celestial blue print and karmic template. Once we understand the meaning and nature of the planetary attributes we can make more intelligent choices participating in, and more fully comprehend the possibilities of this precious human life by raising our frequency as beings of Love.

Numerology and astrology within the context of evolutionary healing practices will be studied in depth. The course is balanced between theory and practice of the Vedic tradition. Ayurveda,

Upayas and Self help remedials are offered to assist the student to revitalize his/her life and be a clear agent of support and knowledge to others. For references on these systems and Christina Richa Devi's bio, see [www.ompalace.ca](http://www.ompalace.ca)
